

Chatham-Kent Cyber Pack

FRC #5689

An occasional newsletter to let our supporters know what's happening!

2019 Important Dates

PARENTS – please ask your team member about the permission form they were given!

They can't attend the competitions without your signature on the forms!

March 28 - March 30 – Windsor Essex Great Lakes District Event competition, @ UWindsor

April 5 - April 7 - Western University, Engineering District Event competition @ WesternU

April 10 - April 13 - Provincial Championships Mississauga (if we qualify)

Let us introduce our newest team member:

“Ramp-age”

Here it is, our 2019 competition robot!

Ramp-age is tall, dark and handsome, and he has a secret!

Meet Ramp-age, the robot that can pick up cargo (rubber balls) and load them into two different levels. Ramp-age will also be able to pull hatch panels (plastic disks) from a wall chute and place them on lower levels to secure the cargo. In the last 30 seconds of the game, robots are to return to their “habitat” which has 3 different levels. Ramp-age *transforms* into a ramp, enabling another robot to be able to drive on top of us to a 19” tall platform to gain a ranking point. We also have special wheels called mecanum wheels that allow the robot to move in all directions including side to side. Come see him in action at our local events in Windsor and London!
